20 - Any additional comments about the instructor, Jacob Miranda. -

Response Rate	12/35 (34.29%)

• Amazing instructor! truly care about students and how we felt about information and if we truly understood how to do it!

• Dr. Miranda, I cannot express how great of a professor you are. The course material was straight forward. We had access to the textbook, notes and could reach out to you for help. I appreciate you really getting to know us during the zoom meetings, and not just reading the material. Asking us frequently do we understand and do we need help, am I going to fast or are you with me. I reached out to you about my anxiety, and how speaking in front of others makes me feel uneasy. And you did not make me feel different or bad about it. You understood and I am very grateful. Before I took this course, I did not have the confidence to understand and pass this course. But you made me feel confident and I actually was surprised how I understood the material and loved to learn more. It was not this way when I took stat 260 the first time. Thank you so much!

• Professor Miranda was such an amazing professor, he really understood his students and truly cared about us and how much we learned in this class.

• Jacob Miranda is an excellent instructor. He took great care to explain concepts and made sure all his students understood. He was very engaging and helpful and treated his students with respect.

• Absolutely wonderful teacher, didn't feel like I was going to class, felt like a learning experience where we were all welcome to talk and never criticized for being wrong, just encouraged to learn the difference.

• Jacob was extremely understanding of my circumstances and worked with me.

• Great Professor!

• Jacob Miranda is an all around phenomenal professor & individual. Each and every one of his students in our Summer II course knew he genuinely cared about our learning and wellbeing. He always made sure to incorporate real world examples and teach us how to apply key concepts from the field of statistics to our everyday lives. He always asked for feedback on how his students were processing and understanding the material he was teaching for the day. If there was anything we didn't understand he had no problem starting from the beginning, trying a different approach or way to explain the concept or formula. Jacob was very relatable and made a lot of efforts to make his zoom students feel comfortable answering questions even if they aren't sure their answer is correct. He was honest with himself and us, if he could sense the class was having a down (not-so-interactive) day he made sure to incorporate breaks for us and even go as far to ask us how are lives & days are going because he knows how stressful being a college student can be. It is very clear Jacob Miranda has a passion for teaching and truly cares if his students understand the material and can apply it into their lives after the course. I can not say enough nice things about Mr. Miranda!!

• Mr. Miranda was an amazing professor. He made sure that no student was left behind during lectures. If someone was confused he would try other alternatives to make sure that everyone as on the same page. Mr. Miranda was hands downs one of the best professors I've ever had.

• Professor Miranda was one of the greatest professors that I have ever had to privilege of being taught by. He was kind and understanding to situations that have happened with me and he helped me work through all of my classwork with excellent guidance. I couldn't have asked for a better professor.

• Jacob is super nice, and considerate of what we deal with as psychology majors. I love that he is willing to take suggestions and see what works best for everyone involved. I wish I was able to see him teach in person because he is great!!! I hope to see him again

• You are a great teacher! I can tell that you really about care about your students. Thank you!

---

21 - Any additional comments about the course.

Response Rate	3/35 (8.57%)

• I only put that I learned "some" in this course because I've previously taken Statistics but I had a hard time with it and it's been almost 4 years so I had forgotten a bit but not all, so I learned a great bit but had prior knowledge as well.

• I recommend more professors that teach this course using the same teaching style as Jacob and take notes on his compassion for his students and passion for his job.

• N/A
